PROFESSIONAL SUMMARY

Data Analyst with a software engineering background and hands-on experience building end-to-end analytics solutions using SQL Server, Python, and Power BI. Skilled in data cleaning, ETL automation, data modeling, exploratory analysis, data-quality testing, and dashboard development. Graduate-level research experience in enterprise cybersecurity and post-quantum cryptography migration.

TECHNICAL SKILLS

Data Analytics: Data Analysis, Data Cleaning, EDA, KPI Analysis, Data Validation

SQL & Databases: SQL Server, SSMS, MySQL, Joins, CTEs, Views, Aggregations, Data Modeling

Python: Python, pandas, Matplotlib, ETL Automation, Automated Data Testing

Business Intelligence: Power BI, DAX, Power Query, Dashboard Development, Data Visualization

Development: Git, GitHub, GitHub Actions, VS Code, Excel, C#, .NET

PROJECTS

Retail Sales Analytics | Python, SQL Server, Power BI, GitHub Actions

github.com/vateythao/retail-sql-powerbi-2024-2026

- Built an end-to-end retail analytics solution covering 9,864 sales records across 2024–2026.
- Automated data cleaning, validation, transformation, consolidation, and SQL Server loading through a reusable Python ETL pipeline.
- Created automated data-quality tests and SQL analytical views supporting daily, monthly, yearly, and KPI reporting.
- Built a 3-page interactive Power BI dashboard, performed pandas/Matplotlib EDA, and implemented GitHub Actions CI for automated testing.

Post-Quantum Cryptography & Enterprise Security Migration | Graduate Capstone Research

- Conducted graduate-level research on enterprise migration to post-quantum cryptography, synthesizing NIST standards, scholarly literature, industry guidance, and an IBM Db2 case study.
- Developed a phased migration roadmap centered on cryptographic discovery, risk prioritization, crypto agility, vendor coordination, governance, and continuous security/performance testing.

PROFESSIONAL EXPERIENCE

FORVAL CAMBODIA | Software Engineer | 2023–2024

- Developed and enhanced internal business applications, including a C# tool for uploading stock data to a cloud-based system.
- Tested and troubleshooted payroll-system issues, resolved bugs, and implemented new application features.
- Provided remote technical support and assisted customers with system issues, configuration, and operational requirements.

EDUCATION

Avila University — Master of Science in Computer Science | 2024–2026

Limkokwing University — Bachelor of Science in Software Engineering | 2019–2023

Phnom Penh International University — Bachelor's Degree in English for Business | 2018–2023

LANGUAGES

Khmer | English
